The longer waterline length of this model allows additional cruising features to be incorporated, as well as increased straight-line speed. In line with the rest of the Xp range, the 50-footer utilises epoxy infusion build processes for improved stiffness with reduced weight, a carbon keel structure for maximum safety and ultimate stability, and a precision-moulded composite keel with iron fin and lead bulb giving a high ballast ratio.</p> <p>A choice of standard aluminium or optional carbon rig packages, and standard or deep draft keels, allows Xp 50 owners to optimise their yacht for cruising or racing, short-handed or fully crewed, inshore, offshore or bluewater sailing.</p>
